

# Appendix E: Pathogens in the NNAP

Bacterial, fungal and yeast positive blood cultures reported to the NNAP in 2018 for the Bloodstream infection and Central line associated bloodstream infection measures have been classified as shown below into organisms whose growth would be regarded as indicative of a bloodstream infection without further confirmatory evidence, and into a list of other organisms. This list of organisms included for NNAP reporting is available below. We are grateful to Professor Paul Heath\* for reviewing and updating this list for the 2018 data year.
